GENERAL SAFETY RULES

WARNING: Read and understand all instructions. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.

WARNING: The warnings, cautions, and instructions discussed in this instruction manual cannot cover all possible conditions or situations that could occur. It must be understood by the operator that common sense and caution are factors which cannot be built into this product, but must be supplied by the operator.

SAVE THESE INSTRUCTIONS

PERSONAL SAFETY

- Do not immerse this product in water or other liquid.
- Do not put this product close to open flame.
- Disconnect this product or remove its batteries before cleaning.

TOOL USE AND CARE

- **Disconnect the power** from the lantern and place the switch in the locked or off position before servicing, adjusting, installing accessories or attachments, or storing. Such preventive safety measures reduce the risk of accidental starting.
- **NOTE:** The lantern needs to charge in full sunlight for 8 hours to allow the rechargeable batteries to reach maximum capacity.
- If LEDs do not light, wipe both ends of the batteries with a clean and dry cloth.

OPERATION

1. To recharge the batteries with solar power, turn the panel to face the sunlight. Charging time about 8 hours (full sunlight).
2. Simply push the switch to turn on.
3. Use the handle to carry or hang the solar lantern.

MAINTENANCE

**WARNING:** Make sure this lantern is disconnected from its power source before attempting any maintenance, cleaning, or inspection.

CLEANING

Use only soap and a damp cloth to clean your solar lantern. Many household cleaners are harmful to plastics and other insulation. Never let liquid get inside a lantern.
