

12,500 Gallon Biodegradable AquaSpherePRO

Installation Instructions and Specifications

CONTENTS

- (2) 4"12,500 gallon (100 to 12,500 gallon) Biodegradable AquaSpherePRO dispensers

PRODUCT SPECIFICATIONS

1. Each AquaSpherePRO treats up to 12,500 gallons of any fresh water pond.
2. Water temperature must be between 34°F and 110°F.
3. The AquaSpherePRO is designed to sink.
4. Each AquaSpherePRO is formulated to treat up to 30 days.

IMPORTANT

1. Read instructions thoroughly before deployment.
2. Unpack and inspect your AquaSpherePRO for any damage.
3. **DO NOT OPEN THE AQUASHEREPRO.** The bags inside the AquaSpherePRO will dissolve instantly upon contact with water.
4. Do not allow AquaSpherePRO to get wet prior to deployment.
5. The biodegradable AquaSpherePRO will completely biodegrade when fully submerged in water over time.

PRE-INSTALLATION REQUIREMENTS

1. Accurately determine and document the number of gallons in the pond.
2. After determining the gallons of water to be treated, have the correct number of AquaSpherePROs ready to deploy.
3. The AquaSpherePRO should be located near the center of the pond or near aeration to maximize dispensing of the product. When multiple AquaSpherePROs are used, they should be distributed evenly throughout the pond.

INSTALLATION INSTRUCTIONS

Deploy AquaSpherePRO into pond 10 – 12 feet from shore line.

REPEAT EVERY 30 DAYS

1. Replace AquaSpherePRO every 30 days. No refills available for the AquaSpherePRO.
(Do not open.)
2. Deploy the new AquaSpherePRO according to above instructions.
