

# POWERHORSE™

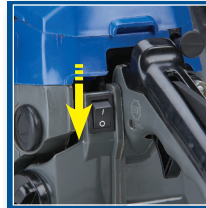

## Chain Saw Starting Guide

1. Push the chainbrake fully forward.

5. Pull the starter rope several times until firing sound is heard.

2. Move the engine switch to the "0" (on) position.

6. Push down on trigger lock while lifting up on throttle trigger to release choke.

3. With fuel visible in primer bulb, press bulb 4-5 times.

7. Continue to pull on starter rope until chain saw is running. Pull chainbrake fully back to operate chain saw.

*Repeat steps 4-7 if engine starts then stops.*

4. Pull choke knob out to close choke

8. To stop the engine, move the engine switch to "1" (stop) position.
