Product Description

EXTEND-A-TRUCK Part# 944 UPS code: 643466970403

Load support designed to fit into a vehicle's 2” receiver hitch.

This dual purpose device functions as a bed extension or as a roof level rack.

Long items are easily secured and safely transported.

Installed or removed in seconds.

Adjusts to match bed height.

Extends 50” from hitch for bed level hauling.

Adjusts for roof level use (from 55” to 52”).

350 lb load capacity.

4' wide support.

Heavy duty tubular steel with durable powder-coated finish.

Stores flat behind seat when not in use.

Each unit consists of 2 tubular steel pieces, one shaped like the letter L, and one shaped like the letter T. Also included are 2 hitch-pins, 2 keeper pins, an instruction sheet and a red flag.

To use EXTEND-A-TRUCK at bed level, insert the long end of the L into the receiver hitch and then install the pin and keeper pin.

To use EXTEND-A-TRUCK at roof level, insert the short end of the L into the receiver hitch and then install the pin and keeper pin.

Next, simply position the T on the other end of the L at the desired height and install the pin and keeper pin.
