

Recommended process for removing the Powerhorse inverter generator side cover for units purchased before March 2015. (Item 42411):

1. Remove the two visible screws on the cover.
2. Remove the spark plug maintenance cover (top access door).
3. Reach inside the spark plug maintenance cover (top access door) and press outward on the side panel.
4. Grab the side panel portion that you pressed out and you will now be able to remove the side panel.
