

NORTHERN[®]
TOOL + EQUIPMENT

FUEL TREATMENT 2-CYCLE/4-CYCLE

FEATURES/BENEFITS

- Protects fuel against water that ethanol attracts
- Ensures easy starting - even after seasonal storage
- Corrosion Prevention - coats and protects your carburetor
- Cleans intake valves
- Cleans carburetor varnish

APPLICATIONS

Fuel Treatment 2-Cycle/4-Cycle is recommended for:

- 2-Cycle Engines
- 4-Cycle Engines
- Lawnmowers
- Hand-held Lawn Care Equipment
- Chainsaws
- Snow Blowers
- Motorcycles
- Generators
- Boats

NTE PART NUMBER

52588

PACKAGE DESCRIPTION

12 oz Bottle

PRODUCT SUMMARY

Using Northern Tool + Equipment Fuel Treatment provides protection for both 2 Cycle Engines and 4 Cycle Engines. Simply add to your fuel container at a treat rate of 1 ounce per 2.5 gallons of fuel for stabilization. Or add 1 ounce per 1 gallon of fuel for maximum fuel system clean-up. When Northern Tool + Equipment Fuel Treatment is introduced, additives are distributed throughout the fuel. A chemical reaction then takes place when the additives come in contact with contaminants or surfaces for which they were designed. Antioxidants usually have a loosely bonded hydrogen atom, available to combine with free radicals and postpone the breakdown of fuel. Cleaners have nitrogen and/or oxygen functionality to neutralize and decompose carbon and gum deposits in the system. Corrosion inhibitors form a barrier on metal parts, protecting them from chemical attack.
