MARINE WHEEL BEARING GREASE

PRODUCT SUMMARY

Northern Tool Marine Wheel Bearing Grease is a multi-purpose NLGI 2 aluminum complex based lubricant recommended for a wide range of applications including lube points where water resistance and rust and corrosion protection are required. Formulated with quality base oils and an aluminum complex based thickener technology which resists water washout and provides superior anti-corrosion protection.

FEATURES/BENEFITS

- Excellent Water Resistance
- Good Thermal Stability
- Excellent Protection Against Wear
- Excellent Oxidation and Corrosion Protection
- Does not Washout Under Water Ingress Conditions
- Made in the USA

APPLICATIONS

Marine Wheel Bearing Grease is recommended for:

- Marine Equipment
- Steel Mills
- Mining
- Construction
- Processing
- Boat Trailers Bearings
- Anti-Friction Bearings
- Sleeve Bearings
- Steer Cables
- Steering Dockside Machinery
- Wheel Bearings
- Steering Quadrants
- Winches

PRODUCT SPECIFICATIONS

Color	Amber
Texture	Smooth
Thickener Type	Aluminum Complex
NLGI Grade	2
Worked Penetration @25C	285
Drop Point, F	500
Base Oil Viscosity @ 40C cSt	220
Base Oil Viscosity @ 100C cSt	17.4
Base Oil Viscosity @ 100F SUS	1194
Base Oil Viscosity @ 210F SUS	89.9
Suggested Operating Temperature Range	0°F-300°F

NTE PART NUMBER

52598

PACKAGE DESCRIPTION

14 oz cartridge
