

Quick Start Guide

P1100 SERIES

Here's a handy quick-start guide to your new winch/hoist.

It's imperative to read and understand your owner's manual and heed all safety warnings. Do not proceed without this understanding.

1

Plan your pull and Anchor Unit

Identify safe and suitable anchor point. Clear area of obstructions.

2

Activate Unit

When ready to use, Connect plug to a suitable power supply and activate unit by turning the red System/ Emergency Stop button by twisting to enable 1/4 turn (popping out) See Figure 1.

Red System/Emergency Stop Button

3

Protect your Cable

For proper cable spooling, tension must always be applied to the cable when powering in or out. Using a gloved hand, unspool cable with tension to prevent cable shifting on the drum.

4

Power Cable In or Out

After your task is complete, wind cable back into winch under tension to keep your cable in good repair.
