

FLOODGATE

Blocks Entryways from Flood Water

- ◆ Stop water in it's path
- ◆ Easy to use & install
- ◆ No alterations needed
- ◆ Installs in just minutes- inside or outside
- ◆ Entryway remains accessible while in use
- ◆ Neoprene sleeve creates water tight seal
- ◆ Expandable sturdy steel frame
- ◆ Adjusts for openings 30in to 50in
- ◆ For larger openings, stanchions join units together
- ◆ Flood protection up to 26in high

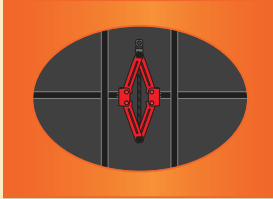

Residential ◆ Commercial ◆ Industrial ◆ Retail ◆ Hospital Government
Nuclear ◆ Hotels ◆ Multi-Tenant Properties & More

Front

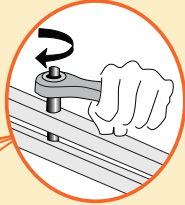

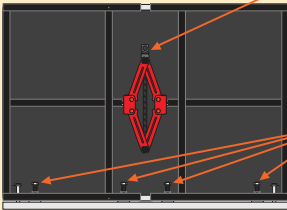

FLOODGATE

With Neoprene Sleeve

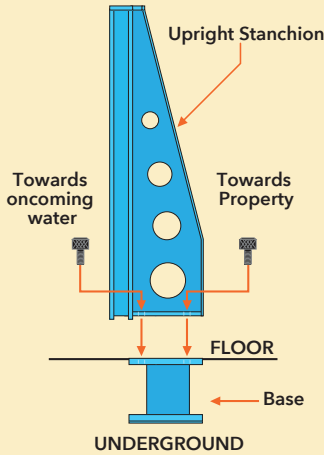

Back

Opening larger than 50in?

Join multiple Flood Gates using the Stanchion

Stanchion (optional)

Note: Base must be pre-mounted underground prior to use. Base sits flush with surface.

Floodgate consists of:

1. 1in Steel Tube Frame - provides the support structure
2. 1/8in Front Steel Flat Sheets- block & take the weight of the water
3. 1.5 ton Scissor Jack - expands & creates a secure fit within door frame
4. Neoprene Sleeve - surrounds entire system & provides a watertight seal around its perimeter
5. Stanchion & Side Rails (optional)

FLOOD GATE
