

# V-GRIP SHELVING™

— Powered by Equipto

At the heart of Equipto's engineered storage solutions is V-Grip, an industrial shelving system design that is unmatched in structural integrity and provides the industry's broadest selection of accessory components to meet virtually any application.

**V-Grip upright posts have an exclusive triangular design that maximizes load-bearing capability while providing a smooth front surface without unsightly holes or hardware.**

**Combine V-Grip components to meet specific applications:**

- Heavy duty steel shelves
- Wire shelves for better flow of light and air
- Versa rack shelf beams accommodate wood, wire or steel shelves
- Modular drawers in 48 different sizes with a capacity of 200 or 400 lbs.
- Use full or partial height dividers to create custom storage bins
- Bulk rack options including solid or wire shelves with spans up to 8 feet and capacities up to 3400 lbs. per level
- Reflective white back and end panels
- Consult Customer Service if you are in a seismic zone

## THE VERSATILITY OF THE V-GRIP UPRIGHT POST

### One Post — Multiple Shelf Options

Wire shelf with integrated wire truss for maximum rigidity.

Bulk rack beams with reinforced waterfall wire decking for maximum load capacity in a wire deck application.

Modular drawers come in 48 standard sizes in 200 lb. and 400 lb. capacity.

Wire rack truss is designed with a rigid 3-point connection for maximum rigidity.

Heavy-duty 18 gauge solid steel shelf.

Bulk rack beams with reinforced drop-in wire decking and heavy-duty 18 gauge corrugated steel deck panels.

## V-Grip Shelving features the most efficient fastening principle known:

Corner shelf reinforcements with extruded studs insert easily into tapered slots in uprights. The shelf corner drops firmly over the corner reinforcement and seats itself. Four-way, crossed tension minimizes deflection and imparts superior strength and rigidity to the unit.

### Versatile V-Grip Uprights

Permit practical back-to-back assembly of shelving units, with the same, strong reinforcement that actually strengthens shelves and uprights, yet permits their easy adjustment, and features a capacity up to 9000 lbs.

## V-GRIP SHELVING WITH DRAWERS

Combining modular drawers with V-Grip shelving optimizes flexibility by providing an ergonomic approach to storing a mix of small and bulk items. Placement of drawers between the knees and shoulders reduces the reaching and bending required of conventional storage cabinets while providing space for bulk storage above and below drawers.

### THE GOLDZONE

The same versatile V-Grip design that gives you the flexibility to add wire shelving and lockable cabinets can also be configured so that all your modular drawers are between your shoulders and knees, or "GOLD ZONE". Consequently, there's no squatting, stretching, or straining to store and retrieve parts and tools.

## 100 YEARS, 100% AMERICAN MADE

We've been creating high-quality, made-in-America products for over a century, and we're not slowing down anytime soon. Our shelving, storage, mezzanine, and conveyor crossover solutions have been installed by some of the largest and most well-known companies in the world, including Harley Davidson, Caterpillar, Boeing, and more.
