

BAILEY HYDRAULICS

Electro-hydraulic Third Function Tractor Kit

An electro-hydraulic third function kit is used to add functionality to a front or rear mounted skid-steer style attachment, such as a backhoe, grapple, auger, forks, broom, or blade. It adds functionality by utilizing the existing power beyond function on your tractor's valving.

This kit comes with a D03 solenoid valve, manifold, and mounting plate, as well as the diodes, wiring harness, Sure Grip AU series control handle, and quick-connect hose adapters. This kit does include installation and wiring information, but does not include hoses. For more information, or to watch our instructional video, go to BaileyHydraulics.com/third-function.

Specifications:

- 3600 PSI pressure rating
- 12 GPM flow rating
- 12VDC D03 solenoid valve
- 3-position spring center tandem
- 2-button, 3-wire handle with adjustable mount
- 1/2" NPT male flat-face coupling
- 1/2" NPT female flat-face coupling
- 3" x 7.19" mounting bracket
- 10 ft. harness with in-line fuse
- Installation guide & video available
