

RUGGED WATERTIGHT CARRY CASE AND HEARTSINE AED COMBO

Experience peace of mind with the **CARDIACT Rugged**, the ultimate solution for remote monitoring of AEDs. Built tough to withstand any environment, this powerful device uses cutting-edge technology like an optical sensor and 4G wireless communication to provide real-time updates on your AED's status, temperature, and incidents.

But that's not all – the **CARDIACT Rugged** also includes an integrated hands-free phone, allowing lay responders to quickly and easily communicate with emergency services.

Protected
IP67 Waterproof Case
for added protection

Optional Call Button

Automatically calls a predetermined number to alert responders. Two-way conversation can be made.
