

ACID A NEUTRALIZER

Neutralizing sulfuric acid

Foaming indicates neutralization in process

Purple color indicates non-acidic

Spilled liquid has been neutralized & absorbed

Shown: Bottle, Pillow, Pads & Sock

Absorb & Neutralize Acid Spills

- Neutralizes lower pH liquids to a pH 7 range
- Absorbent solidifies for easy removal
- pH color indicator shows when liquid has been safely neutralized.

Directions:

- Place Pad, Sock or Pillow around & onto the spill
- Sprinkle Powder around & onto the spill
- Allow to encapsulate & neutralize
- Color change will occur during neutralization
- Once neutral, pick up or sweep, scoop & dispose
- Dispose of neutralized blend in accordance with local, state & federal regulations.

	Red: Highly Acidic
	Yellow: Slightly Acidic
	Purple: Neutral

Caution:

Caution: During neutralization, some heat & gas emissions may be generated, use in well ventilated area.

Appropriate personal protective equipment should be used.

**Not for use on: Hydrofluoric Acid, Fluorine & 2, 4, 6-Trinitrotoluene. Contact with food products containing sugars may form carbon monoxide gas.*

PAN36-10G

**Battery Rack
Neutralizing Pillows**
Passes FMVSS 302 Flammability tests

Acid pillows at bottom of battery rack

Acid Neutralizing Sock in use

Typical Neutralization Rates/Unit

	ACID NEUTRALIZER % Concentration	BOTTLES (2 lbs)		PILLOWS & SOCKS (1.5 lbs)		MATS (0.055 lbs)	
		Pints	Liters	Pints	Liters	Pints	Liters
Sulfuric	50%	1.600	0.756	1.200	0.567	0.044	0.021
	10%	4.790	2.262	3.593	1.697	0.132	0.062
Nitric	68%	1.920	0.907	1.440	0.680	0.053	0.025
	40%	3.200	1.511	2.400	1.134	0.088	0.042
	10%	6.390	3.018	4.793	2.264	0.176	0.083
Acetic	100%	1.280	0.605	0.960	0.453	0.035	0.017
	78%	1.920	0.907	1.440	0.680	0.053	0.025
	40%	3.200	1.511	2.400	1.134	0.088	0.042
Phosphoric	40%	1.740	0.822	1.305	0.616	0.048	0.023
	10%	4.790	2.262	3.593	1.697	0.132	0.062
