

BASE B NEUTRALIZER

Neutralizing sodium hydroxide

Foaming indicates neutralization in process

Orange color indicates non-caustic

Spilled liquid has been neutralized & absorbed

BASE NEUTRALIZER

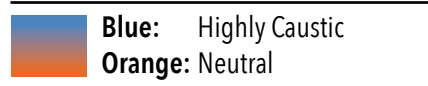

Shown: Bottle, Pillow, Pads & Sock

Absorb & Neutralize Base Spills

- Neutralizes higher pH liquids to a pH 7 range
- Absorbent solidifies for easy removal
- pH color indicator shows when liquid has been safely neutralized.

Directions:

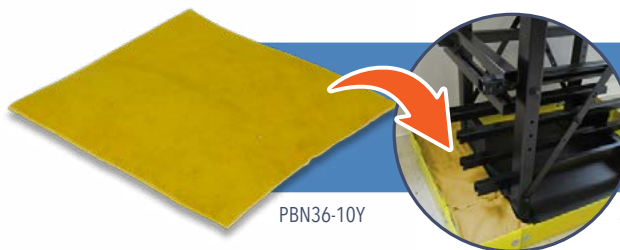

- Place Pad, Sock or Pillow around & onto the spill
- Sprinkle Powder around & onto the spill
- Allow to encapsulate & neutralize
- Color change will occur during neutralization
- Once neutral, pick up or sweep, scoop & dispose
- Dispose of neutralized blend in accordance with local, state & federal regulations.

CAUTION: During neutralization, some heat & off gassing will occur. Not recommended for use on metallic nitrates, cyanides, sulfides & strong oxidizers. Contact with sodium or calcium hypochlorite creates chlorine gas.

Use in well ventilated area.

Appropriate personal protective equipment should be used.
