SUNEX Tools Launches SX2302 & SX2302K Heavy-Duty Long Barrel Air Hammer and Kit

Power Meets Precision for Automotive Professionals

Greer, SC (July 1, 2025) – SUNEX Tools announces the release of the SX2302 Heavy-Duty Long Barrel Air Hammer, engineered for maximum impact, user comfort, and jobsite productivity. Delivering an impressive 2,300 BPM and a 3.75" stroke, the SX2302 is built to handle demanding tasks like bolt cutting, pin driving, and suspension component separation with ease.

Equipped with a hardened steel piston for long-term reliability, this air hammer features a lightweight die-cast aluminum body for superior control. SUNEX's patented damping system and active air spring technology significantly reduce vibration and absorb shock, allowing extended use with less fatigue.

Designed with efficiency in mind, the SX2302 includes a quick-change chuck for standard 0.401" chisels and a front exhaust that directs air and debris away from the user. Whether you're working on shocks, rivets, or ball joints, this tool delivers powerful performance in a durable, ergonomic package.

Additionally, the new SUNEX Heavy-Duty Long Barrel Air Hammer is available as a kit in the SX2302K. In addition to the hammer, it includes a durable roll pouch, the kit includes: a 4" hammer, 7" tapered punch, single blade panel cutter, cold chisel, and a deluxe panel cutter—ready for any bolt, rivet, or bodywork challenge. With built-in vibration and shock reduction, a front exhaust system, and a precision-machined barrel, the SX2302K is built to deliver performance and durability.

Key Features – SX2302 Long Barrel Air Hammer

- **2,300 BPM:** Fast, powerful hammering for demanding automotive and industrial applications.
 - **3.75" Stroke Length:** Optimal reach and impact for heavy-duty work.
 - **Patented Damping System:** Reduces vibration for enhanced comfort and longer work sessions.
 - **Active Air Spring Technology:** Smooth operation with shock absorption for better control.
 - **Hardened Steel Piston:** Long-lasting durability under pressure.
 - **Lightweight Die-Cast Aluminum Body:** Easy to maneuver without sacrificing strength.
 - **Quick-Change Chuck Retainer:** Accepts standard 0.401" shank chisels for fast bit swaps.
 - **Precision-Machined Steel Barrel:** Reinforced strength and reliability in tough conditions.
 - **Front Exhaust Design:** Keeps air and debris away for a cleaner, safer workspace.
