TECHNICAL INFORMATION

Color	Dark Brown
Odor	Odorless
pH	13+
State	Liquid
DOT	Hazardous (Sodium Hydroxide)

Power Brite is an aggressive, heavy duty brushless brown truck wash. It is ITD's flagship truck wash product and one of the most popular truck wash concentrates in the industry. Power Brite will remove carbon stack stain and magnetic road film from the inside and outside of tractors & trailers, without brushing. Used correctly, it will clean painted and aluminum surfaces without damage. Power Brite can be used in drive through truck washes or with pressure washers, will work in cold or hot water, and will rinse free at any temperature.

DIRECTIONS FOR USE:

Depending on the intended end use dilution rate, distributors will often make 2 drums from this super concentrate before sale to the end user.

After Drum Dilution, recommended dilution rates are as follows:

Hot Water - 1:100

Cold Water - 1:50

Power Brite manages hard water up to 20 grains. Do not use on polished/anodized aluminum or polysealed surfaces. Do not use on painted surfaces at concentrations of less than 1:40. Do not allow to dry on surfaces, keep wet and always rinse thoroughly.
