| Color | Yellow |
| Odor | Characteristic |
| pH | ≤3 |
| State | Liquid |
| DOT | Hazardous (Hydrochloric Acid) |

FOR PROFESSIONAL USE ONLY. ProRestore 21 is appropriate for multiple surface restoration. Restores many types of exterior building cladding, including limestone, terracotta, concrete and many others. This removes color stain from most surfaces. This product will remove, clean and de-blush many sealers.

DIRECTIONS FOR USE:

ProRestore 21 is to be used as is. Do Not Dilute.

Caution: Do not allow product to dry on the surface. Always rinse thoroughly. Do not use on polished stone and metallic oxide film used for tinting or self-cleaning glass.

Not recommended for restoration of antique glass, brass, copper or bronze. Not recommended for horizontal surfaces, with the exception of non-colored concrete.

Use lower rinse pressures when cleaning sensitive substrates. When in doubt, follow the manufacturer's recommended P.S.I. for the substrate on which you are working. Extended dwell time is very important when using this product.
