ERGUO S2

Assembly Instruction Manual

GRABO ERGUO S2 Assembly Instruction Manual

The GRABO ERGUO S2 is an extension arm compatible with all GRABO models, creating an ergonomic lifting solution that eliminates the need for bending. It securely attaches to the GRABO's four anchor points, ensuring a stable connection. By integrating the GRABO ERGUO S2, you can enhance jobsite comfort and efficiency, effortlessly handling heavy items while significantly reducing strain. Elevate your lifting experience and prioritize ergonomics with the GRABO ERGUO S2.

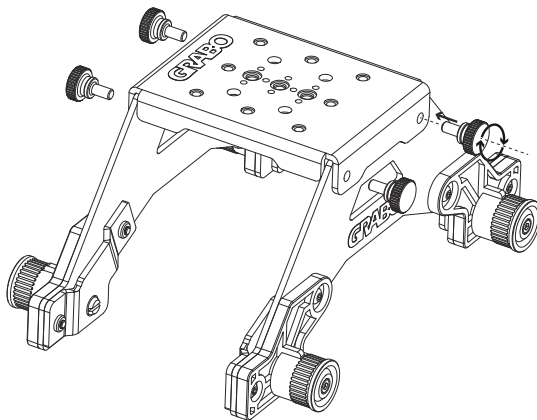

GRABO ERGUO S2 Kit includes:

- 1x GRABO Attachment Plate
- 1x GRABO ERGUO S2 Extension Arm

Note: The GRABO tool is not included.

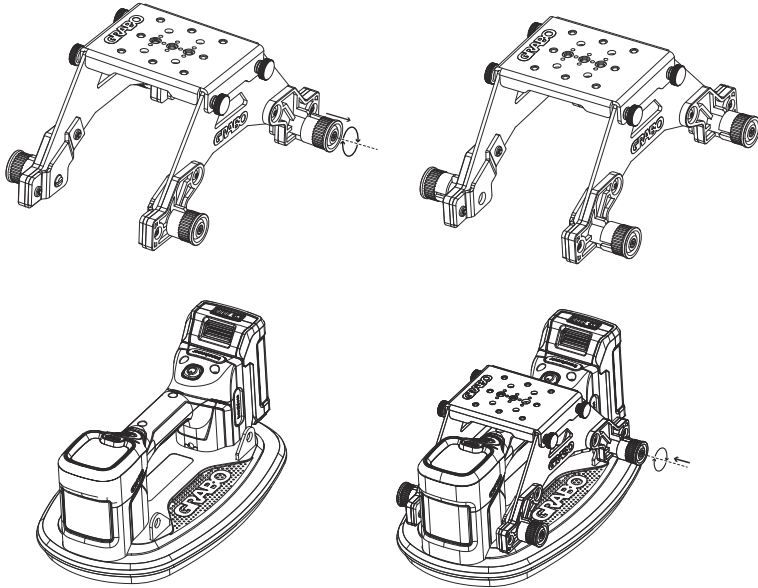

Step 1. Install the Metal Bracket Cover

- Locate the four torx thumbscrews, the metal brackets, and the metal bracket cover.
- Position the bracket cover on the metal brackets as depicted in the illustration.
- Fasten the torx thumbscrews to secure the bracket cover.

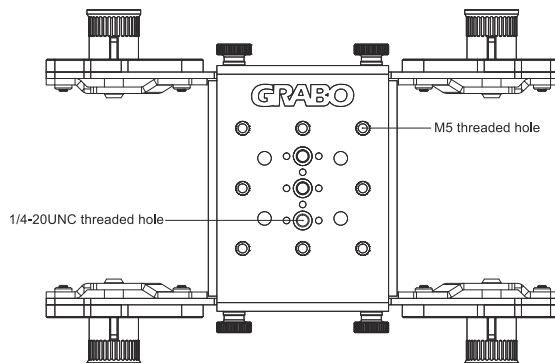

Step 2. Attach the Metal Bracket to the GRABO Tool

- Place the Metal Bracket on the GRABO tool.
- Align each spring lock pin with the metal anchor points on the GRABO tool.
- Tighten each pin to secure the bracket.

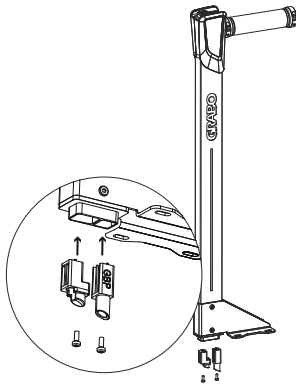

* There are 8x M5 threaded holes and 3x 1/4-20UNC threaded holes on the top, allowing for various tools to be adapted to the aperture.

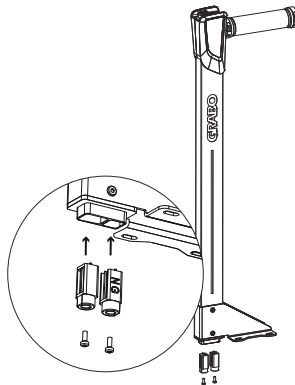

Step 3. Install the Handle Bottom Suction Button

- Select the corresponding Pump Button and Release Button according to different GRABO tools and lock it with Torx Pan Screw.
